

Kundalini Yoga Raw Food Diet

Since the dawn of creation, the Tantrics and Yogis have realized that in our physical bodies there is a potential force. It is not psychological, philosophical or transcendental; it is a dynamic potential force in the material body and it is called KUNDALINI. Scientists the world over have begun looking into this phenomenon but their research will not find anything new in this field. They are only discovering and substantiating what Yogis discovered many, many, years ago.

The Kundalini is situated at the root of the spinal column. To awaken this energy Yogis devised and prepared themselves through various techniques such as asanas, pranayama, meditation etc and thus Kundalini Yoga was born. It is a series of practices that enhances and creates awareness of the subtle energy centers (Chakras) that make up the physical body. With dedicated practice when one is able to direct ones prana into the seat of kundalini, the energy wakes up and makes its way through the central nervous canal to the brain, weaving its way upwards through each chakra as the dormant sleeping areas start blossoming like flowers. This awakened state is called by various names such as samadhi, nirvana, moksha, communion, union, kaivalya, or liberation.

MYSTIC-ASIA

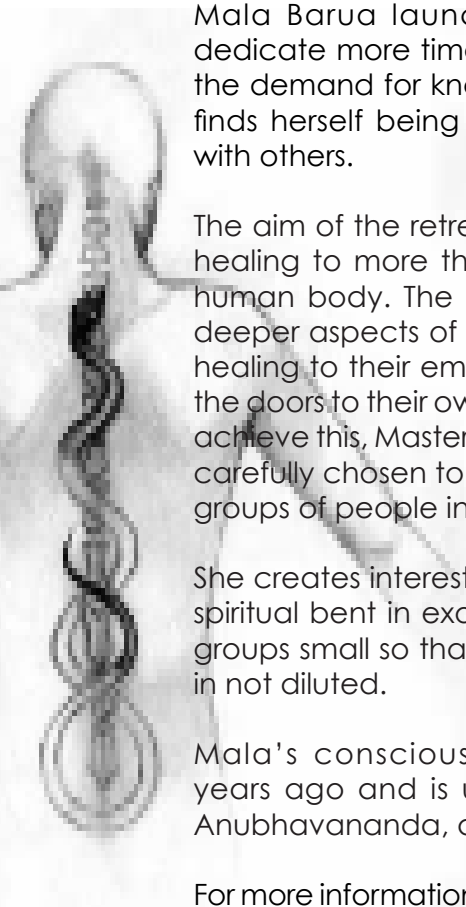

Mala Barua launched Mystic-Asia recently to dedicate more time to the mission of her heart. As the demand for knowledge of the Self grows Mala finds herself being able to share more and more with others.

The aim of the retreats created by Mala is to bring healing to more than the physical aspects of the human body. The participants get to explore the deeper aspects of their existence thereby bringing healing to their emotional states. This in turn opens the doors to their own spiritual aspirations. In order to achieve this, Masters of various spiritual traditions are carefully chosen to deliver ancient wisdom to small groups of people in a luxury environment.

She creates interesting and unusual retreats, with a spiritual bent in exotic parts of Asia and keeps her groups small so that the richness of the experience is not diluted.

Mala's conscious spiritual journey started 17 years ago and is under the guidance of Swami Anubhavananda, a teacher of Vedanta.

About Goa

Goa is the new holiday destination in India. Having been a home to backpacking travellers for many years, it has now evolved into a more gentrefied yet authentic mixture of several cultures .With the combination of Portugese colonization, the western hippies and the new rich indians buying homes, Goa is now a delightful melting pot of restaurats, boutiques, beaches, resorts & markets.

While in Goa, you may also visit the old Portugese colony called Old Goa with its interesting Cathedrals & Churches. Or take a trip on a boat down the River Mandovi.

Other interesting activities could be a day by the beach doing water sports or even heading south to enjoy the vast white sandy beaches available there.
